Professional Summary

AI and XR enthusiast pursuing B.Tech in Artificial Intelligence and Data Science, with hands-on experience in building real-time AI solutions and immersive AR/VR applications. Skilled in machine learning, deep learning, NLP, and computer vision. Known for solving real-world problems creatively and leading impactful projects. Eager to contribute to innovative teams working at the intersection of AI and immersive tech.

Education

Panimalar Engineering College, Chennai,

B.Tech – Artificial Intelligence and Data Science

2022 - 2026

- GPA: 7.66/10 (6th semester)
- **Relevant Coursework:** Machine Learning, Deep Learning, Natural Language Processing, Data Science, Computer Vision
- Actively involved in **AI/ML** and **XR projects** with hands-on practical exposure

Experience

• Product Developer Intern

Wizardlenz XR Studio Pvt Ltd – Remote

June 2024 – August 2024

- Contributed to “The Spell” project involving Augmented Reality, Artificial Intelligence, and Machine Learning
- Developed and tested immersive AR features using Unity and Python for real-time interaction
- Collaborated with cross-functional teams to deploy the solution in a production environment

• Artificial Intelligence Intern

Externsclub Pvt Ltd – Remote

July 2023- August 2023

- Built and optimized a computer vision model for object detection using OpenCV and deep learning techniques
- Enhanced real-time accuracy and implemented image preprocessing pipelines for better model performance
- Applied Python and TensorFlow to process video feeds and detect multiple object classes.
- **Forage** - Deloitte Australia - Data Analytics Job Simulation.
- **Forage** - Deloitte Australia - Technology Job Simulation.

Projects

Sign Language to Text Translation

Python, OpenCV, TensorFlow

- Developed a real-time computer vision system that translates sign language gestures into spoken Tamil/English
- Enabled accessibility through live gesture recognition and speech output using deep learning

Semantic Search using OpenAI GPT-3.5

Python, Vector DBs

- Built a semantic search engine using OpenAI’s GPT and embedding models to retrieve contextually relevant answers
- Integrated a QA pipeline for intelligent document querying

Reviving Old Tales – AR Temple Explorer

Unity, ARCore, Blender

- Designed an augmented reality experience that brings historical temples and stories to life
- Provided interactive learning through virtual storytelling and guided temple exploration

Travenoverse – VR Travel Experience

Unity, VR SDKs

- Developed a virtual tourism app allowing users to explore destinations with live overlays and narration
- Integrated real-time content with location-based AR triggers

Technologies

Languages: Python, Java, C++, SQL

Frameworks & Tools: TensorFlow, OpenCV, LangChain, Git, Unity, ARCore, Power BI, Tableau, IBM Cloud

Technologies: Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Augmented Reality (AR), Virtual Reality (VR).

Certifications

- **Data Science for Beginners** – FutureSkills Prime (NASSCOM)
- **Data Science** – Board Infinity
- **Enterprise-grade AI** – IBM
- **Oracle Cloud Infrastructure: Generative AI 2024** – Oracle
- **Python** – GUVI Geek Network
- **C++ Best Practices for Developers** – LinkedIn Learning
- **RPA Development** – UiPath
- **Build Your Metaverse** – Munjal Birmingham City University, Centre of Innovation and Entrepreneurship

Accomplishments

- **Best Project Award** – Recognized at *PECTEAM 2k23* for innovative technical project execution
- **Hackathon Coordinator** – Successfully organized *India's First Women-Centric 24-Hour Hackathon – TechDivathon 2025*
- **Finalist** – Selected in *Ideathon Contest*, Panimalar Engineering College
- **Internship Success** – Delivered impactful results during internships at *Wizardlenz XR Studio* and *Externsclub Pvt Ltd*
